

BL SWIPER® SERIES

NozzTeq®
Taking Science to the Sewer®

866-620-5915

REDUCES BLOWN TOILET EFFECT!

The BL Swiper® is a special poly-construction that is safe for use in lined, PVC and sensitive pipes
Fits in pipe sizes 3" and up!

BL SWIPER® NOZZLE

VORTEX & VENTURI EFFECT

- Patented sewer nozzle technology that can reduce the amount of the "Blown Toilet" effect.
- BL Swiper uses air channels that coincide with each jet stream to increase the cleaning power at operating pressures as low as 400 PSI.
- Reduces the truck's RPM which in return will reduce wear and tear and fuel consumption.
- Reduce water usage in some cases as low as 22 GPM with smaller units and 1" units as low as 32 GPM
- HIGH QUALITY STAINLESS STEEL tubes that direct water to each jet and a special poly construction.
- The largest BL Swiper can be used to de-water larger sewers or storm lines (Venturi Effect).

WHY Nozzteq? Because our Equipment is Engineered for Long Lasting Performance!
