GREAT FOR ICE BLOCKAGES

ICE BEAR™ SEWER NOZZLES

COST EFFECTIVE PENETRATOR

- Due to its criss cross pattern, the ICE BEAR sewer nozzle was developed to penetrate lines filled with ice.
- This sewer cleaning nozzle has a short design with bevel edge to get in those hard to reach spots and less likely to get stuck.
- Low jet angel for maximum thrusting power to go longer and farther down the pipe.
- Jet size is fixed and adapted to your pump capacity with fixed orifices.
- Even in this simple design we use Laminar design to create a better flow for a longer and farther jet stream.

WHY Nozzteq? Because our Equipment is Engineered for Long Lasting Performance!
