**RECYCLED WATER FRIENDLY WITH
INTERCHANGEABLE JETS**

MANTA™ BOTTOM CLEANER

LOW GRAVITY FOR CORRECT PIPE POSITION

- MANTA™ is developed in cooperation with our customers, as a complement to our popular C-RAY™ Nozzle series.
- MANTA™ is made for large pipe cleaning or cleaning of smaller pipes where debris is at the bottom of the pipe.
- MANTA™ has a tough and wear resistant inner design to handle the abrasiveness from re-cycling trucks. The internal flow design minimizes pressures, flow losses and gives optimum pulling and cleaning power.
- Through a flexible exchange system of the rear end, number of jets can easily be altered - 8, 10 and 12 jets - for a perfect match to pipe size and pump capacity.
- MANTA™ has a system of interchangeable wear runners.

WHY Nozzteq? Because our Equipment is Engineered for Long Lasting Performance!
