

NozzTeq®
Taking Science to the Sewer®

866-620-5915

HYDRO EXCAVATION

Distributed by NozzTeq

The Monro-Jet® Circular motion of water jets increase cleaning capacity by up to 3 times the cleaning power with 36,250 psi.

F-4 is the most desirable for basic Vac Trucks

MONRO JET® NOZZLE

UNIQUE ORBITAL DESIGN

- MONRO JET® nozzles combine the high power of the point jet with the large surface achievement of the flat jet.
- The Orbital design allows it to clean larger areas faster and more efficient.
- They can be used with all certified high pressure connections and be installed onto lances, pistols and robots.
- By its compact design, the MONRO JET® nozzle can be used in the building construction as well as in the civil and underground engineering fields for surface processing and cleaning.
- Several times higher cleaning, easy, simple, tough and reliable. This is not a throw away nozzle and can be rebuilt with new orbital tips.

WHY Nozzteq? Because our Equipment is Engineered for Long Lasting Performance!
