

NozzTeq®

Taking Science to the Sewer®

866-620-5915

REAR & FRONT JETS

SUPER GOBLIN™ GREASE EATER

THE ORIGINAL LAMINAR FLOW

- Goblin Grease Eater is the original Laminar Flow sewer nozzle with 5/15 Degree jets, 5/30 Degree jets and optional front jet and now there is the option for 4 front jets.
- Most effective sewer nozzle for grease removal with a fixed jet pattern.
- Can calibrate the nozzle with the same as other NozzTeq nozzles to match pump specs and hose length.
- High Quality stainless steel construction inside and out with optional sleeve.
- Developed in 1984, this sewer nozzle design is still in use today by many competitors.
- Goblin Grease Eater has water bearing walls to ensure smooth water streams and less turbulence.

WHY Nozzteq? Because our Equipment is Engineered for Long Lasting Performance!
