

# GOBLIN® GRENADE SERIES

**NozzTeq®**  
Taking Science to the Sewer®

866-620-5915

**OPTIMUM MANEUVERABILITY**

## **GRENADE® - PRACTICAL & EASY TO USE**

**HEAVY & STAYS AT THE BOTTOM OF THE PIPE**

- Goblin® Grenade is engineered for optimum maneuverability and to prevent nozzle from getting stuck on off-sets.
- All sizes of Goblin® Grenade have replaceable jet orifices for easy adaptation to different pump capacities.
- All Goblin® Grenades have one replaceable front jet which can be blocked if desired.
- Supplied with stainless steel or ceramic jets.
- Improved internal flow design, compared with conventional nozzles, the turbulent flows are reduced and a more efficient cleaning is obtained.
- The high weight can be advantageous since Goblin® Grenade normally stays more firmly to the bottom of the pipe.

**WHY Nozzteq? Because our Equipment is Engineered for Long Lasting Performance!**
