RECYCLED WATER FRIENDLY

10 Year Warranty

JAWS[®] RC SEWER NOZZLE

HEAVY DUTY CONSTRUCTION

- JAWS RC was developed to be used with recycled water trucks to withstand the extra wear these types of trucks can put on nozzles / Must be used with ceramic jets.
- QUALITY STAINLESS steel construction and must be used with wear body or sled system.
- Sleek design prevents nozzle from “getting stuck” in sewer and storm pipes.
- We use the same Tier III technology with looping the water around in tubes for a powerful water stream.
- Optional front jet can be used with the wear body only and we block it in a sled.

WHY Nozzteq? Because our Equipment is Engineered for Long Lasting Performance!
